

"like water off a duck`s back"

PCT 56 WATER REPELLENT TECHNOLOGY NO MORE PAINT FAILURES!!!!

PRODUCT CODE D-003

FEATURES AND BENEFITS

Water, the most precious life supporting substance known to man is also the greatest destroyer of any age of house or building. In the form of dampness it can weaken or destroy brickwork, plaster, concrete foundations and lead to horrific paint failures.

PCT 56 WATER REPELLENT TECHNOLOGY is a chemical procedure to prevent the penetration of water or moisture by injection or surface treatment in any one of the following:

- Rising damp
- Penetrating damp
- Condensation
- Gravity

During application the chemical enters the cavities or capillaries in the substrate when it extracts oxygen from the carrier and in conjunction with atmospheric carbons crystallization takes place. A permanent water impermeable barrier is created.

FEATURES:

- Ease of application
- Water repellent
- Economical
- No thinning required
- Excellent flow properties
- Impermeable to water
- Acid and alkali resistant
- Availability
- Over coating
- Primer
- Application
- Save on paint usage
- Paint life extended

BENEFITS:

- No expensive or sophisticated equipment required.
- Water or moisture is unable to penetrate the surface.
- A truly inexpensive product when considering application rates.
- Use as is. Do not thin or reduce.
- No expensive equipment required to apply.
- Water or moisture is unable to penetrate the film.
- Inorganic and permanent..
- Available nationally via 16 dedicated licensed distributors.
- May be over coated with any paint.
- An economical substitute for primers and undercoats
- Application expenses reduced dramatically.
- Reduced number of paint coats required.
- Extends the life of paint dramatically.

The information contained in this document is meant as a guide for the specifier or user. It is gained from laboratory tests conducted in controlled environment and experience. No guarantee of performance is implied since application procedure, conditions of use, substrate condition and substrate cleanliness is beyond our control.
